

Froe Bros' Responsibility vs Customer's Responsibility

Froe Bros Responsibility

Site inspection.

Well Drilling, fracking, etc.

Water line and electric hook-up to pressure tank and pressure switch or VFD.

Once water has been run for a reasonable time, a water sample will be taken.

Customer's Responsibility

- Site prep, if necessary (tree removal, etc.), and site clean up after drilling is complete.
- Hire an excavator to dig in water and electrical lines - Froe Bros can assist.
- Hire plumber to do water line hook-up from pressure tank to rest of house/cabin.
- Hire electrician to run a designated circuit from the electrical panel to the pressure switch in house/cabin.

Having trouble?

- Within our responsibility - contact us!
- Within your responsibility - contact your plumber or electrician.

What to Expect

We have no control over water quality. Our drillers will drill to a reasonable depth for the amount of water necessary. Although we are not a water treatment company, we do have some options available to assist you with your new well.
